

BOTTLE-RECOVER_X

AUTOMATIC PRODUCT RECOVERY SYSTEM

The Bottle-Recoverx is a unique solid dose product recovery system. Its revolutionary design allows the operator to automatically recover product from containers of various shapes and sizes.

The Bottle-Recoverx is designed to automatically recover small, medium and large batches of product from finished containers with speeds up to 40 BPM, with minimal setup time and using only one operator.

A built-in loading table and conveyor feed allow the operator to feed containers into the Bottle-Recoverx ergonomically, and efficiently.

Benefits of the Bottle-Recoverx:

- Reduce costs of product recovery, rework, and waste disposal
- Minimize personal injury from repetitive motion
- Increase productivity and morale of production personnel
- Eliminate the need for storage of batches to be reworked
- Prevent damage and contamination of recovered product
- Realize a quick return on investment

AUTOMATIC PRODUCT RECOVERY MACHINE

Features:

At the heart of the Bottle-Recoverx is a flexible container handling system. Its pick-and-place operation ensures that containers remain captive throughout the process, thus minimizing the risk of spills with unstable containers.

Holding bins are conveniently housed in the Bottle-Recoverx base where recovered product, cotton, desiccants, and waste packaging materials are all contained separately.

The Bottle-Recoverx is versatile and handles a wide range of containers. Quick setup features have been designed into the machine resulting in a machine that changes over in minutes. Mounted on casters, it can easily be wheeled to a convenient location in your plant where the recovery operation is to take place.

Technical Specifications:

- Machine speed: up to 40 BPM
(Optional higher speed attachments available)
- Container range: Round, Rectangular, Square, Oblong, 1" to 4"
- Closure types: Standard, CR, Metal, Snap-On
- Construction: Anodized aluminum, stainless steel, and approved plastics
- Power requirements:
120 VAC - 1 - 60 Hz, 15 Amp.
- Air requirements: 5 CFM at 90 PSI
- Vacuum requirements: Plant Vacuum
- Dimensions: 60" x 30" x 54" High
(36" console height)
- Machine weight: 500 lbs
- Product bin capacity: 1.5 cu.ft.

Features of the Bottle-Recoverx:

- Machine mounted on casters with quick utilities disconnect to facilitate mobility
- Loading table and feed conveyor are integral part of the machine
- Interlocked safety guarding to prevent injury from moving parts
- Product, container and waste bins are equipped with sensors to indicate when bins are full
- Dust extraction port provided at the rear of the machine
- All product contact parts are of sanitary design and autoclavable
- Operator friendly touchscreen panel with on-screen setup sheets
- Machine self diagnostics allow for quick fault finding
- Cleaning instructions and operating manual are included
- Metal detector in product chute (Optional)
