

Mechanical Engineer / Designer – Packaging Machines

Opportunity:

Located in the Montreal West Island, BellatRx is a leading manufacturer of packaging equipment and complete lines serving a broad range of industries including food, beverage, pharmaceutical, nutraceutical, and personal care for solid products, liquid, powders, and granules.

We are currently expanding the size and scope of our business in Canada, in the USA and internationally. If you have the skills, experience, teamwork spirit, passion for quality products and exceptional service, we would like to meet with you.

Job Description:

We are presently seeking a Montreal office-based **mechanical engineer / designer** to join our growing team. The ideal candidate must have a proven track record in mechanical machine design and troubleshooting of packaging equipment and assembly lines, with a minimum of 5 years of experience in a similar position. Relevant experience in the packaging industry is an important asset. Permanent full-time position. Competitive compensation and group insurance plan. Free parking is available. hr@bellatrx.com

Responsibilities:

Your responsibilities will include, but not be limited to the following:

- Mechanical design for new and existing equipment
- Create mechanical and pneumatic drawings
- Communicate with suppliers as required
- Trouble shoot mechanical aspects of new equipment, identify and fix problems
- Test new equipment to make sure it performs according to specifications
- Evaluate machine functioning and propose improvements as required
- Analyze customer requirements and specifications
- Support customers (phone, and in person) on the operation and troubleshooting of equipment
- When necessary, travel to customer sites to assess, setup or train on equipment
- Solve and facilitate customer service issues as they arise
- Man the booth at trade shows when required
- Develop equipment technical documentation package
- Perform duties related to special project as required.

Qualifications:

- Very good fluency in English (both written and spoken) and working knowledge of French
- DEC (mechanical) minimum education, Mechanical Engineering Bachelor degree preferred
- Minimum 5 years experience in mechanical machine design
- Must have minimum 3 years working experience with Autodesk Inventor drawing software
- Mechanical/pneumatic and electrical aptitudes are necessary

- Ability to read engineering drawings
- Meticulous and detail oriented
- Able to work with little guidance, alone as well as in a team
- Shows initiative and drive and willing to learn and grow with the company
- Good communicator
- Good knowledge of MS Office mandatory
- Knowledge of pharmaceutical line packaging or related equipment is an asset
