## MANUAL DEBLISTERING MACHINE

The Recoverx is a manual de-blistering machine which requires no change parts.

This machine is designed to provide years of worry - free operation and setup repeatability - it is extremely easy to use.

The Recoverx is a portable unit and integrates easily into your deblistering process. Simply place it on a convenient work surface where the recovery operation is to take place.

A product holding bin is conveniently located in the machine frame to collect the recovered product.

The Recoverx is made from precision manufactured anodized aluminum and stainless steel, with a polyurethane product roller to meet GMP requirements.

### Benefits of Product Recovery:

- Reduce production waste and disposal costs
- Avoid product contamination or damage
- Lower labour costs
- Minimize risk of personal injury from repetitive motion
